**www.thetoufeeq.com**

## PROFESSIONAL SUMMARY

- Proficient Full Stack Developer with expertise in front-end technologies like **React.js, Next.js, TypeScript, JavaScript (ES6+), jQuery, HTML5, CSS3**, and **Tailwind CSS**, alongside back-end skills in **Python, Django, RESTful APIs, MongoDB**, and **MySQL**.
- Skilled in crafting **dynamic, responsive, and user-friendly interfaces** using tools like **Figma, Redux**, and **GSAP**, ensuring seamless UI/UX and optimized performance.

## EDUCATION

**University of West London (UWL)**                                                                                    London, UK
Bachelor of Science in Computer Science                                                                              Jan 2023
- **Pursuing First-Class Honours** (equivalent to a GPA of 9/10)

## TECHNICAL SKILLS

- **Front-End Languages**:  JavaScript (ES6+), React.js, Next.js, jQuery, Tailwind, Typescript, HTML, CSS, Responsive Web Design, Bootstrap, Redux, GSAP, Figma, Git
- **Back End Languages**:  Python, Django, RESTful APIs, Java
- **Database**:  MongoDB, MySQL, Oracle

## RELATED EXPERIENCE

**Perfexion Information Technologies Pty Ltd.**                                                                 Hyderabad, India
*Web Development Intern*                                                                                      June – August 2023
- Contributed to the **development and maintenance** of dynamic web applications using **JavaScript, React.js, and Django**, delivering improved user experiences and enhanced back-end performance.
- Played a key role in implementing **new features**, resulting in a **15% reduction in page load times** and a **20% increase in user engagement** through responsive and optimized design practices.
- Integrated **RESTful APIs** to enhance application scalability and reliability while efficiently resolving front-end and back-end issues to ensure seamless performance.

## PROJECT EXPERIENCE

**Mystery Message Platform**

*Personal Project –* Link - GitHub                                                         November 2024 – January 2025
- Designed and implemented functionality for users to generate and share unique URLs to receive anonymous messages.
- Focused on security, scalability, and a seamless user experience, ensuring robust authentication and efficient data management.
- Developed a platform using Next.js, React, TypeScript, Tailwind CSS, MongoDB, and Next AUTH to enable anonymous messaging.

**MyBlogs - Personal Blog Platform**

*Personal Project –* Link - GitHub                                                         October 2024 – December 2024
- Enabled users to securely sign up, create, edit, and manage blog posts with a focus on user-friendliness and responsiveness.
- Leveraged Appwrite for backend services, including authentication and database management.
- Developed a modern blog platform using React.js, JavaScript, HTML, React Hook Form, Redux Toolkit, Tailwind CSS, and Appwrite.

## Freelance Experience

**Salon Website**                                                                                    December 2023 – Jan 2024
- Achieved an 80% improvement in **user engagement** by implementing innovative design strategies and crafting a **user-friendly**, **responsive interface** optimized for various devices.
- H Designed and developed a **scalable backend architecture** to handle increasing traffic seamlessly, ensuring a fast and reliable browsing experience.
- Streamlined the deployment process with **CI/CD pipelines** to ensure efficient and error-free updates to the live website

## HONORS & INVOLVEMENT

- **Website Development:** Designed and developed the **University of West London (UWL)** Film Society website, delivering a user-friendly interface and regularly updating content.
