EDUCATION

The University of Edinburgh — Edinburgh, UK
Master of Science in Artificial Intelligence — Sep 2026 – Present

- **Course Representative:** Representing MSc Artificial Intelligence students and communicating student feedback and academic concerns to the programme team.
- **Relevant Coursework:** Machine Learning Practical, Natural Language Processing, Probabilistic Machine Learning.

University of West London — London, UK
Bachelor of Science in Computer Science — Feb 2023 – Feb 2026

- Achieved First-Class Honours (equivalent to a GPA of 9)
- **Relevant Coursework:** High-Performance Computing, Distributed Systems, Algorithms & Data Structures, AI & Machine Learning, Software Engineering

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux Toolkit, GSAP, Figma

Testing & Tools: Jenkins, Docker, CI/CD, AWS, Linux, Git, Vercel

Backend: Python, Java, Django, Fast API

Methodologies: Agile, Scrum, Unit Testing, Problem Solving

Databases: MySQL, MongoDB, Firebase, Oracle

PROFESSIONAL EXPERIENCE

Venuza Future Energy Ltd. — Aberdeen, Scotland
Software Engineering Intern — Feb 2025 – Mar 2025

- Contributed to the development of a hydrogen energy management tool in the renewable energy sector.
- Built and tested energy simulation algorithms and developed back-end logic for feasibility analysis.
- Designed interactive UI interfaces and integrated data input-output for cost analysis and reporting.

Perfexion Information Technologies Pty Ltd. — Hyderabad, India
Web Developer Intern — Jun 2023 – Aug 2023

- Built and maintained responsive web applications using React.js, JavaScript, and Django, improving page performance and user experience.
- Implemented new UI features that reduced load times by 15% and boosted engagement by 20%.
- Integrated RESTful APIs for scalable data handling and optimized front-end/back-end communication.

PROJECT EXPERIENCE

Mystery Message Platform – Link – GitHub

- Developed a platform using Next.js, React, TypeScript, Tailwind CSS, MongoDB, and Next AUTH to enable anonymous messaging.
- Focused on security, scalability, and seamless user experience, ensuring robust authentication and efficient data management.

AI-Based Student Detection and Attendance Monitoring System – GitHub

- Developed an AI-driven classroom attendance system using YOLOv8, TensorFlow, and OpenCV to detect and count students in real time from live video feeds.
- Achieved ~93% mean average precision (mAP@0.5) and 27 FPS processing speed through optimized model fine-tuning and GPU acceleration.
- Implemented a full-stack web platform with Flask (Python) backend, React.js frontend, and MongoDB database for real-time data logging and dashboard visualization

MyBlogs - Personal Blog Platform – Link – GitHub

- Developed a modern blog platform using React.js, JavaScript, HTML, React Hook Form, Redux Toolkit, Tailwind
- CSS, and Appwrite.
- Enabled users to securely sign up, create, edit, and manage blog posts with a user-friendly interface using React
- Hook Form, Zod for validation, JWT authentication, and session management

HONORS & INVOLVEMENT

- 1st Prize – UWL x SEGA Hackathon (2025), University of West London in collaboration with SEGA Europe – Link
- Developed UWL Film Society website with user-friendly UI and dynamic content updates
